

From: Janes, Elizabeth
Location: DOGGR Sacramento/EPA via webinar TBD
Importance: Normal
Subject: UIC reporting
Start Date/Time: Thur 10/16/2014 7:00:00 AM
End Date/Time: Fri 10/17/2014 7:00:00 AM

Hello Jerry: per your email, this is an invitation to save the date. The actual meeting time will depend on whether or not we need to revisit the logic for extracting the numbers.

Please forward meeting to any other staff involved in deriving inventory numbers and 7520 data, including the geothermal point of contact.

Geothermal staff do not need to attend all of meeting. If they can provide the inventory via xls as they have in the past, that is sufficient.

Another agenda topic of interest to EPA, would be the state of CalWIMS, and the potential for building an extract logic to it to derive 7520 data. If it is capturing inspection and MIT dates, along with violations and enforcement, it should be possible to build a series of filters to generate an injection well data set for the national UIC data tables. A demo of how CalWIMS data is entered on UIC regulatory activities would be appreciated.

Thanks
